

International Symposium on 250 Years of Engineering and Architecture in Turkey

The symposium aims to reveal, document and convey to the society the 250-year-long history of engineering and architecture in Turkey. To this end, we invite all interested researchers to investigate the developments in different fields of engineering and architecture over the past 250 years and present their findings at the symposium.

Original scientific papers that will introduce the contributions of engineering education, which started in Turkey with the Mühendishane-i Bahr-i Hümayun in 1773, to our country and the world will be presented and discussed at the symposium.

During the symposium, panels will be organized with the participation of invited speakers who are experts in their fields. Thus, the participants will have the opportunity to listen to the speakers' comments about the development of engineering and architecture, their contributions to humanity and how they shape life.

Participation in the symposium is free of charge, but those who would like to attend must register before the specified deadline. The International Symposium on 250 Years of Engineering and Architecture in Turkey is planned to be held face-to-face at the campuses of Istanbul Technical University.

It is expected that the papers to be sent to the symposium are original works. The papers will be evaluated by at least two reviewers. Papers and presentations should be prepared in accordance with the templates of the symposium. Paper and presentation templates can be downloaded from the <https://250yil.itu.edu.tr/en/homepage> web page. The language of the symposium will be Turkish and English. Paper presentation time will be 20 minutes.

Symposium Topics

- History and development of engineering and architecture
- Engineering and architecture in Turkey before and after the Republic
- Engineering and architecture in the world
- Engineering and architecture education
- Important engineering and architecture projects in Turkey
- Important engineering and architecture projects in the world
- Contributions of engineers and architects to society
- Interaction between professions
- Old and new engineering and architecture tools
- Perception of engineering and architecture from past to present
- Problems and responsibilities of engineers and architects
- Engineering and architecture ethics

Important Dates

Paper submission deadline: 31 December 2021
Author notification date: 20 March 2022
Preprint submission deadline: 10 April 2022
Sending of paper acceptance letters: 20 April 2022
Announcement of detailed program: 10 May 2022
Symposium registration deadline: 14 May 2022
Symposium dates: 19-20-21 May 2022
